

WALLTITE®

The airtight insulation solution

Summary of key benefits...

- Insulation with no joints or gaps** → Spray application of WALLTITE insulating material produces a seamless insulating layer with no joints or gaps and reduces energy loss due to thermal bridging.
- Maximum insulating performance at minimum thickness** → WALLTITE has an extremely low thermal conductivity not achieved by any other conventional insulating material, saving valuable space.
- Insulation of components in hard to treat areas** → Liquid installation means that critical, inaccessible or curved areas can be insulated without any problem – no need for laborious cutting and fitting.
- Excellent adhesion to the substrate** → WALLTITE fits like a second skin and is suitable for virtually all substrates such as corrugated fibre cement, profiled metal sheet or timber boards.
- Prolongs the life of buildings** → WALLTITE rigid, robust, closed-cell foam demonstrably improves the construction and life of buildings.
- Rapid installation times** → An experienced installation team can treat many m² of roof area a day with a foaming unit, when conditions are favourable.
- Safe, professional installation** → Trained, qualified people from certified installation companies guarantee safe, accurate application of the spray foam.
- Increases comfort in the home** → Residents of buildings insulated with WALLTITE report an improved indoor environment and a greater degree of comfort.
- Low material weight** → WALLTITE's low weight places very little stress on components making it safer, for example, when there is heavy snow on flat roofs.
- Quality assurance through self-monitoring** → BASF plc is certified to BS EN ISO 9001, ISO/TS 16949: 2002 and BS EN ISO 14001. Each batch is checked and tested before delivery. Relevant countries have local product certifications for WALLTITE.
- Easy to transport and store** → WALLTITE is foamed as a liquid mixture on site which means rapid transport and space-saving storage at the site.
